

## IT Solutions (agile)

**UITech: high performance and ready for future vision**

### Infrastructure & Network

#### Servers (HPE, DELL, Huawei ...):

- Determining the best server architecture, sizing and even brand based on technical requirement for each service or application.
- Server and server accessories installation.
- Fit to purpose hardware configuration (RAID, Management ...)
- Installing operating systems (Windows/Linux, oracle ...).
- Applying updates and patches for BIOS firmware.
- Security configuration for Operating systems

#### Network Solutions (Cisco, Aruba, Huawei, AVAYA ...):

- Assessment for client need for providing fit to purpose network design.
- Network solutions such as routing, wireless, firewalls, and switching. Including hardware sizing and configuration that guarantee the maximum performance and security for the networks.
- Enhancement on the design. (Including SDWAN best solution) (enabling the environment for Zero trust).
- Plan change roadmap.
- Full documentation
- Monitoring and tuning.
- VOIP Solutions.

#### Datacenters

- Datacenter designs and consultations.
- Rack installation and connections best practices designs.
- Documentation.
