*Today's Achievement For
Tomorrow's Vision*

The background features a network diagram with black nodes and lines on a dark blue gradient. The diagram is composed of several interconnected nodes, some of which are highlighted in larger circles. The overall aesthetic is modern and tech-oriented.

VISION

Our vision is to put the company in a leading position in the field of IT & Infosec solutions, by contributing in building effective and agile solutions that make deference to the development, stability and continuity of the business by applying our philosophy of continuous reassessing and developing cycle. We look forward to keep both of our company & client business in a futuristic state of utilizing the technology latest trends & solutions.

MISSION: is to....

Providing solutions based on effectiveness, knowledge, better use of resources, and continuous development of resources to ensure that they keep pace with technical developments

OUR IDENTITY

In its pursuit to achieve a leading position among of technology and information security providers in KSA, United Ingaz Technology (UITech) took a smart move by forming a partnership with AIMS Technology, thereby transitioning from being one of the group's companies specialized in providing technical services internally to the group's companies , to expanding its services to the market as a service provider in the kingdom, benefiting from AIMS's extensive expertise in various technology and information security sectors

METHODOLOGY:

assessment:

- Comprehensive and accurate evaluation of the business and nature of operations in any organization, studying the needs and potential benefits of deploying technology services and information security solutions while adhering to governance rules and principles to support core business objectives is the fundamental and primary pillar of providing solutions. We will seek to achieve a balance between investments in information technology solutions and the expected benefits of these investments.
- Analyzing and identifying gaps in the use of advanced information technology solutions through a deep understanding of the current business state compared to the ideal targeted state, while incorporating sector-specific standards, controls, and governance principles and best practices.

Innovative Design

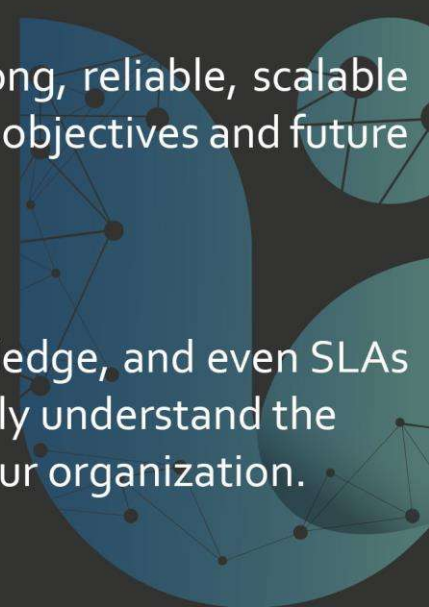

- Design/redesign your solutions according to assessment and common understanding between our company and client teams

move your business forward

- Good assessment plus creative design will provide strong, reliable, scalable and innovative solutions that serve your business current objectives and future expansions.

Slas & Consultancy

- We are committed to provide our best expertise, knowledge, and even SLAs to support your business continuity & expansions by firstly understand the business needs, opportunities, nature & the culture of your organization.
